WHY BAMIX®?

bamix® – the versatile hand-held blender that can do much more than a food processor.

The bamix® concept is based on a few, easy-to-use components:

- › bamix® up to 350 W and 22,000 rpm
- › Stand for accessories
- › Multi-purpose blade for mincing, puréeing, straining and stirring stodgy and heavy foods
- › Beater blade for whipped cream, whipped egg white, frappés, etc.
- › Whisk blade for preparing salad dressings and mayonnaise, mixing light doughs, mashing potatoes, etc.
- › Meat mincer for chopping meat, fish and long-fibre vegetables
- › Processor and grinder for milling cereals, chopping herbs, spices and cheese, grinding coffee, sugar, etc.
- › bamix® PowderDisc – perfect results in no time. The spare part/accessorie for the bamix® processor pulverise dry spices effortlessly and easily.
- › Together with the bamix® hand blender, the SliceSy® is the perfect "all-in-one" food processor. An indispensable accessory for those who appreciate quick and easy handling.

bamix® does away with time-consuming food preparation. Designed for modern kitchens and a versatile cuisine. No need for additional kitchen appliances.

THE NEW BAMIX® APP

download now!

BAMIX® OFFERS A LOT OF ADVANTAGES

Versatile

The bamix® is the perfect appliance for a huge range of different tasks. It can be safely used in small containers and glassware as well as in hot saucepans on the hob. The bamix® comes with a double insulated and fully sealed housing for deep immersion into hot and cold liquids.

Easy to use

Thanks to its unique and ergonomically optimised design, the bamix® does not slip from your hand and can be controlled with a single finger. All accessories are designed for easy attachment and removal.

Easy to clean

The bamix® is extremely easy to clean. Simply hold the cutter guard under hot running water – done!

Storage

Placed in its stand or wall bracket, the bamix® is always close at hand and leaves enough space even in a small kitchen.

Quality

The bamix® is a Swiss quality product made to last. It will serve you for many years to come. All parts are made from high-grade material and can be ordered from stock at any time. The strong motor is a bamix® design. All motors are produced at the company's factory in Switzerland. 100% made in Switzerland.

Applications

The bamix® is popular with gourmet chefs and other food professionals, as well as with people who just love to cook at home. They know that they can always rely on their bamix®, as it has been designed for durability.

bamix® is simply brilliant

bamix® saves time, money and hassle. As it takes the work out of preparing food, the bamix® will soon be the most used appliance in your kitchen – from breakfast in the morning to late evening dinners.

Repair service

Many kitchen appliances cannot be repaired – but the bamix® is different. Many of our devices have been in use for over 30 years and can still be repaired, should there ever be a problem.

Lower power rating – higher performance

Thanks to the excellent quality of the product and the long-time spare parts availability, you do not need to replace your bamix® every few years, as a repair is normally the better option. By opting for high speeds and perfect torques, we have been able to achieve excellent performance at comparatively low power ratings.

App and Website

The bamix® app offers numerous advantages. Along with full access to the bamix® recipes, you will also find exclusive bamix® recipes as well as a shopping list function. Our new updated website offers a lot of additional background informations and knowledge for using the bamix® perfectly.

As the inventor of the hand blender, with its unique, ergonomic shape, bamix® has been inspiring cooks around the globe since 1954.

The bamix® is unique in terms of durability and performance. Due to the high proportion of work which is done by hand, it lasts a lifetime and can master even the toughest tasks in the kitchen with flying colours.

All parts come from suppliers in Switzerland and are made from high-quality materials - 100% made in Switzerland, sustainable, repairable and, as a result, resource-saving.

BAMIX® HISTORY

bamix® – a success story starting in 1954

For more than 60 years, bamix® has been conquering kitchens all over the world.

Conceived by Swiss inventor Roger Perrinjaquet, the first bamix® was sold in 1954 and the appliance has since become the trusted companion of food lovers around the globe. Every year, around 400,000 bamix® appliances are made at the factory of ESGE AG in Mettlen, Switzerland.

Looking at conventional food processors, the inventor of the device clearly saw the advantages of an appliance that could be used directly in the containers in which food is prepared, doing away with moving ingredients from one bowl to another. He called his invention bamix®, based on the French words for beating (battre) and mixing (mixer).

100% made in Switzerland.
Hand-made in our factory.

ALL-IN-ONE KITCHEN APPLIANCE

bamix® is the smallest yet most efficient and versatile kitchen appliance in the world. Thanks to the various bamix® accessories, the appliance is the ideal helper for a huge range of tasks.

It can be used to chop, mince, purée, emulsify, mix, blend, froth, grind, pulverise, grate and whip food. At the same time, the bamix® is extremely easy to operate and clean.

With only two accessories, namely the SliceSy® and the processor, your bamix® becomes the master of all tasks in your kitchen. Small and compact.

bamix® 100% Swiss quality

For the manufacturers of the bamix®, sustainability is not just a slogan but part of the idea behind the product. For the last 60 years, the company has worked hard to protect resources, for instance by making sure that even a bamix® that is twenty years old can still be repaired. At the factory in Mettlen, the appliances are screwed together rather than glued and welded, so that they can be opened at any time for a thorough inspection and repair.

As it is made from top-quality materials, your bamix® is however unlikely to ever break down. The extremely powerful motor is made to last, and makes very little noise. The timeless design of the appliance is based entirely on functionality and good ergonomics.

Every day, top chefs all over the world rely on the bamix® to prepare their creations. In their kitchens, the bamix® rarely stands still. For more than 12 million users, the bamix® has become an indispensable kitchen appliance.

Lifetime Motor Guarantee

In April 2020, bamix® introduced the outstanding LIFETIME GUARANTEE for the bamix® motor – for bamix® is a 100% Swiss product of outstanding quality.

THE NEW BAMIX® CORDLESS. CURIOUS ABOUT THE NEW CONVENIENCE?

- › High-end battery hand blender with a working time up to 20 min
- › Easy extractable, replaceable and sophisticated Li-Ion battery with no memory effect

BAMIX® ACCESSORIES PURÉEING. WHIPPING. EMULSIFYING. CHOPPING.

The bamix® is the smallest but most efficient and most versatile food processor in the world. Thanks to the wide range of bamix® accessories, the bamix® is the ideal helper for a large number of tasks. It can cut, chop, mince, puree, froth, grind, pulverise and grate. The bamix® is also very easy to use and clean.

Chops

MULTI-PURPOSE BLADE

The **bamix® multi-purpose blade** for mashing vegetables and cooked meat in soups, sauces and baby food; for mincing fresh and frozen fruit and berries for desserts, jams, ice cream and sorbets. The multi-purpose blade even crushes ice cubes for refreshing drinks and cocktails.

Blends

WHISK

The **bamix® whisk blade** is the ideal tool for pancake mixes and egg doughs, salad dressings, mayonnaise, mashed potatoes, cocktails and shakes.

Aerates

BEATER

The **bamix® beater blade** produces deliciously frothy whipped cream, whipped egg whites, frappés, soufflés and other desserts; blends sauces and shakes, and even beats low-fat milk to a perfect mousse.

Chops

MEAT MINCER

The **bamix® meat mincer** cuts, minces and purées both raw and cooked meat as well as fish and long-fibre vegetables.

BAMIX® CONTAINERS HANDY. VERSATILE.

bamix® beakers come with snap-on lids. They are therefore not only perfect for use with the bamix®, but also serve as storage containers for all types of food. Made from top-quality materials, they are shatter-proof and heat-resistant up to +150 °C. The beakers and jugs made from foodgrade material are dishwasher-proof and the glass beaker set can be placed in the freezer and in the microwave oven.

BEAKER SET

with lid, 400 ml, 600 ml, measuring scale markings, shock-resistant. Not microwaveable.

JUG

with lid, 1000 ml, measuring scale markings, shock-resistant. Not microwaveable.

NEW

GLASS BEAKER SET

Premium set of 2 beakers, 400 ml and 700 ml, made of borosilicate, with black PP lids.

BAMIX® STANDS ALWAYS READY TO HAND.

Simply and conveniently placed on the worktop, you will always have your bamix® hand blender where you need it. Always ready for use, the bamix® is probably one of the most important and versatile helpers in your kitchen. The ingenious stand provides space for all attachments and is suitable for all bamix® hand blenders, except the Gastro models.

STAND DELUXE

Functional storage made easy. The **bamix® stand DeLuxe** offers the perfect storage for your bamix® blender, including numerous accessories.

BAMIX® PROCESSOR AND GRINDER GRINDING. MINCING. PULVERISING.

Use the attachments to chop any dry foodstuff such as cured meat, dried vegetables and mushrooms, hard cheese, nuts, cereals and seeds. Or turn peanuts into peanut butter.

The processor and grinder are equally indispensable for moist food. Mince and blend small portions of bread spreads and baby food, chop garlic, onions, coconut flesh, chili peppers, horse radish and kitchen herbs, or small portions of meat or fish, and boiled eggs. The processor and the transparent grinder also chip chocolate for tasty cakes and decorations. They turn sugar cubes into icing sugar and chop dry bread into breadcrumbs – clean and easy.

PROCESSOR

For people who love herbs and spices, the **bamix® processor** is simply a must: nothing tastes better and more genuinely exotic than freshly ground cinnamon, nutmeg or chili.

Pulverises

POWDERDISC

The **bamix® PowderDisc** is an accessory for the bamix® processor – it is designed for pulverising dry foodstuffs.

GRINDER

The **bamix® grinder** turns your muesli into a treat. Freshly ground ingredients, topped with nuts, fill you with energy. Enjoy your breakfast with a full-flavoured coffee made from freshly ground beans.

BAMIX® SLICESY® GRATING, SLICING, CUTTING, CHOPPING – LIKE MAGIC.
