NEW PRODUCT  
BROCHURE 2024

# ONE GROUP. ONE BRAND.

In the scope of today's constantly evolving situation, we looked upon the histories of our brands and concluded that the time has come to write a new chapter. Hence, we, a 70-year-old global family of local manufacturers, have decided to reinvent ourselves.

Please welcome Djois, the new and unique brand of the T3L Group.

Djois embodies the essence of what Tarifold, Jalema and 3L Office have always been about: offering organization and structure to help active people achieving their goals...and be happy about it!

Djois is a more modern, short and positive brand that will take a new angle to speak to its customers.

Moreover, Djois' heart is green. As our former brands have often been pioneers in introducing environmental-friendly products, we will push even harder developing products as commitment to a better planet.

As a result, Djois will replace the Tarifold, 3L Office and Jalema brands in a rolling change through 2023. Note: none of our logistic or product data will be affected by this change.

The benefits for you:

- A new eco-trendy brand that is in line with today's end-user's expectations.
- Additional sales opportunities.
- Simplified marketing and sales process.
- Renewed marketing content, new and consistent graphic identity.
- An ambitious roadmap to lower our environmental impact.
- New and greener products every year.

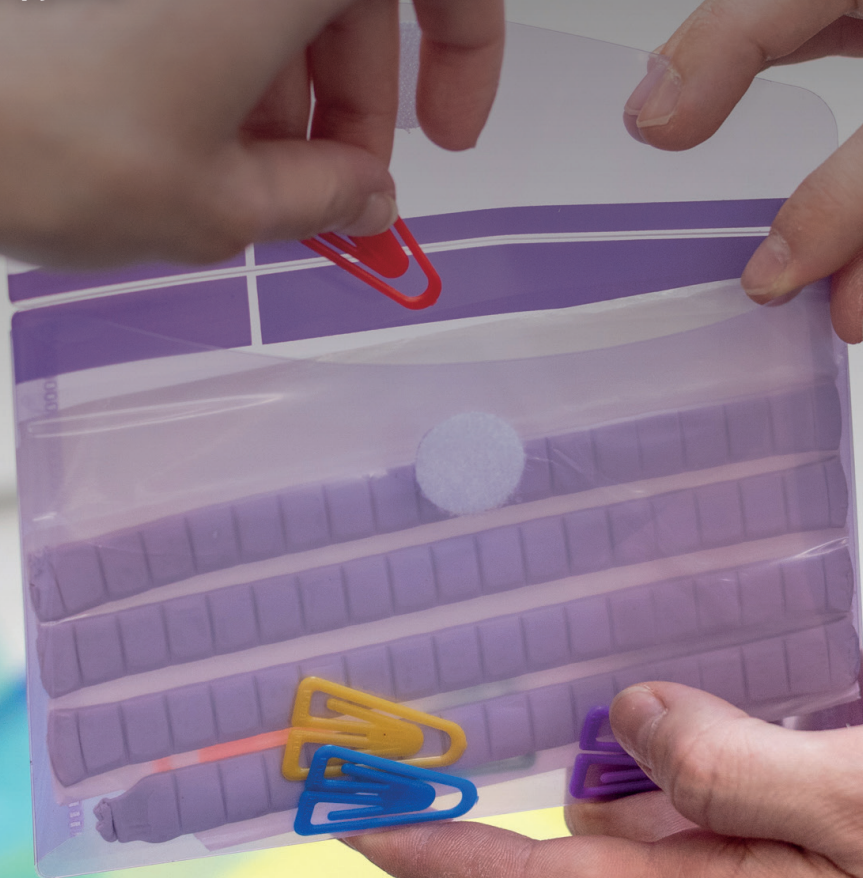

# COLOR COLLECTION

**Color Collection transitions to new post-consumer recycled polypropylene.**

As you know, the T3L Group brands (Tarifold, 3LOP and Jalema) are being replaced by a new and unique brand: Djois.

A new brand with an even stronger commitment to the planet. We have begun this transition by switching our Color Collection products over to post-consumer recycled (PCR) polypropylene.

The new Color Collection products will be:

- REACH compliant,
- Made with at least 80% post-consumer recycled polypropylene (rPP),
- 100% recyclable.

All Color Collection products will transition progressively to the new Djois brand and the new rPP material. This new material, developed with our supplier, has the same properties and quality as the old one. The look and feel of the products are therefore identical to the previous ones.

Furthermore, article numbers, EAN codes, and all logistic data will remain the same.

The changes brought on by the switch to the new environmentally friendly material are minimal, while the positive impacts on the environment will be maximised!

# SECOLOR

## Secolor transitions to new cardboard quality.

We have always prided ourselves on our high-quality cardboard products. These products have always been made of 'virgin' FSC® certified cardboard. But the new realities of the world markets have led us to accelerate our transition to sustainability to diminish our environmental impact.

With this in mind, we have decided to switch over most of our Secolor cardboard products from 'virgin' to 100% recycled cardboard.

This improved cardboard 'recipe' will ensure high quality, availability, but above all else, increased sustainability of our products and company.

The new cardboard will be:

- 250 g cardboard,
- FSC® and Blue Angel certified,
- Chlorine and acid free,
- 100% recycled and recyclable.

The changes brought on by the switch to the new environmentally friendly material for customers are minimal: article numbers, EAN codes, and all logistic data remain the same; but we do hope our impact on the environment will be maximised!

# SMARTFOLDER

## Smartfolder relaunch, new cardboard quality and new colours.

Just like with our Secolor range, we have chosen to switch over the entire Smartfolder range from 'virgin' to 100% recycled cardboard. A choice in alignment with our principles, motivated by sustainability and our willingness to do our share for the planet. This environmentally friendly cardstock will continue to ensure the high quality of our products, but above all else our increased sustainability.

The new cardboard will have increased added value for users:

- 250 g cardstock,
- FSC® and Blue Angel® certified,
- Chlorine and acid free,
- 100% recycled and recyclable.

The change in material will also be accompanied by a change in colour scheme. The old pastel colours will give way to a new, brighter colour assortment. The new colour assortment for our assorted pack will be Red, Green, Grey, Yellow, Orange and Blue.

Red, Green, Yellow and Blue remain in the assortment, but in a brighter shade than before. Grey will replace the old Cream colour, Orange will replace the old Purple colour.

Article numbers, EAN codes, packaging and logistic data of all products concerned will remain unchanged. This transition will be complete by December 2023.
